

All the children of this world (Alle Kinder dieser Erde)

Text: Lore Kleikamp

Musik: Detlev Jöcker

1. When a child is little it has to sleep much
Then it learns how to sit, stand, walk
It learns how to grasp with its hands
Learns to speak words and to understand

2. If a child is sick it suffers pain
If it is happy, it laughs out loud
If it is sad then it starts weeping
Whether its skin is dark or bright

Refrain:

All the children of this world
Everywhere, they are so much alike
High up North, deep down South
All around the globe
All the children of this world
Everywhere, they wish to live in peace
High up North, deep down South
All around the globe

3. If a child is hungry it needs feeding
If it is tired, then it sleeps
It needs our love and understanding
And only wants to be happy after all

Refrain:

All the children of this world ...
